

Quicksilver Air INC

*Utility Helicopter Operations &
Wildlife Capture Specialists*

Hi all,

We hope your summer season is going well!

This is a short update on Quicksilver's activities since we were last in touch. We've mostly been working up in Alaska the past few months, whether it be through shifting geologists, biologists, surveyors or capturing wildlife we have been kept busy as you will see in our latest photos.

*Chuck & Daryl placing a
cadastral monument above the
Anaktuvuk River*

We have recently added to our helicopter fleet and now have an additional MD500 helicopter, which gives us a total of four MD500's alongside our Robinson R44's.

*Rick with R44, Caribou Comps,
Mount Foraker, McKinley Park,
Alaska*

*Mark with a grizzly boar, ADFG,
Tok, Alaska*

MD500 at Anaktuvuk Pass

*Releasing caribou, ADFG,
Teshekpuk Lake, North Slope,
Alaska*

*Rick with young grizzly, Unit 13,
Glennallen, Alaska*

We would also like to welcome a new pilot to our team, Brent Lithgow. Brent has 24 years of flying experience and will be working between both Alaska and Colorado on general utility and wildlife capture work.

MD500 'enjoying' the summer flowers in Alaska

We are looking forward to working with many of you during the upcoming months so please contact us regarding availability for your various projects.

Grizzly bear cubs waiting for 'Mum' to wake up

Best Regards

Rick & Sharon Swisher

And all the Quicksilver Air team
